

Colocation Done Right

Layer42's Carrier Neutral Datacenters in Santa Clara and Mountain View are designed to offer state-of-the-art redundant systems that assure network uptime, power availability, cooling, and security. Both facilities are SSAE16 Type 2 and PCI compliant. Our flexible colocation product offering allows you to scale your business as it grows. We feature power density up to 30kW per rack, flexible power options and a 24x7x365 On-site network operations staff to help service and protect your critical data and applications.

Single Cabinet Package:

- 1 Full locking cabinet (24w x 42d x 84h)
